Protective Packaging

Detailed Packaging Analysis

At Polymer Packaging we don't just want to be your packaging supplier; we want to be your packaging partner. Let one of our experienced team members do an analysis of your current packaging method and costs vs cost saving alternatives that won't compromise your products protection. This value adding service is offered at no cost to you, and the potential savings are huge!

Sustainable Protective Packaging

Polymer Packaging is proud to offer packaging options that protect the environment, as well as your product. These include but are not limited to:

Green Eco-Bubble

Bubble wrap that is made with 25% recycled material, and is recyclable itself

Paper Void Fill

Our ready-to-use range of recycled, virgin, newsprint, bogus and tissue paper are available in a variety of paper grades and sizes.

Paper Lattice Wrap

This paper-based, wrappable packaging provides light cushioning and interleaving protection as it nests within itself, locking products into place.
